Answer a Kuipp / Question / Reply

A hand-drawn UI sketch for a mobile application screen titled "Kuipp". At the top left is a back arrow icon. Below the title is a large rectangular text input area with a "150" character count indicator at the bottom right. Below the text box is a "Post" button. At the bottom of the screen is a "Keyboard" label, which is connected by an arrow to the text "Standard keyboard output".

Annotations:

- off white background
- white text box
- 150
- Post
- Keyboard
- Standard keyboard output

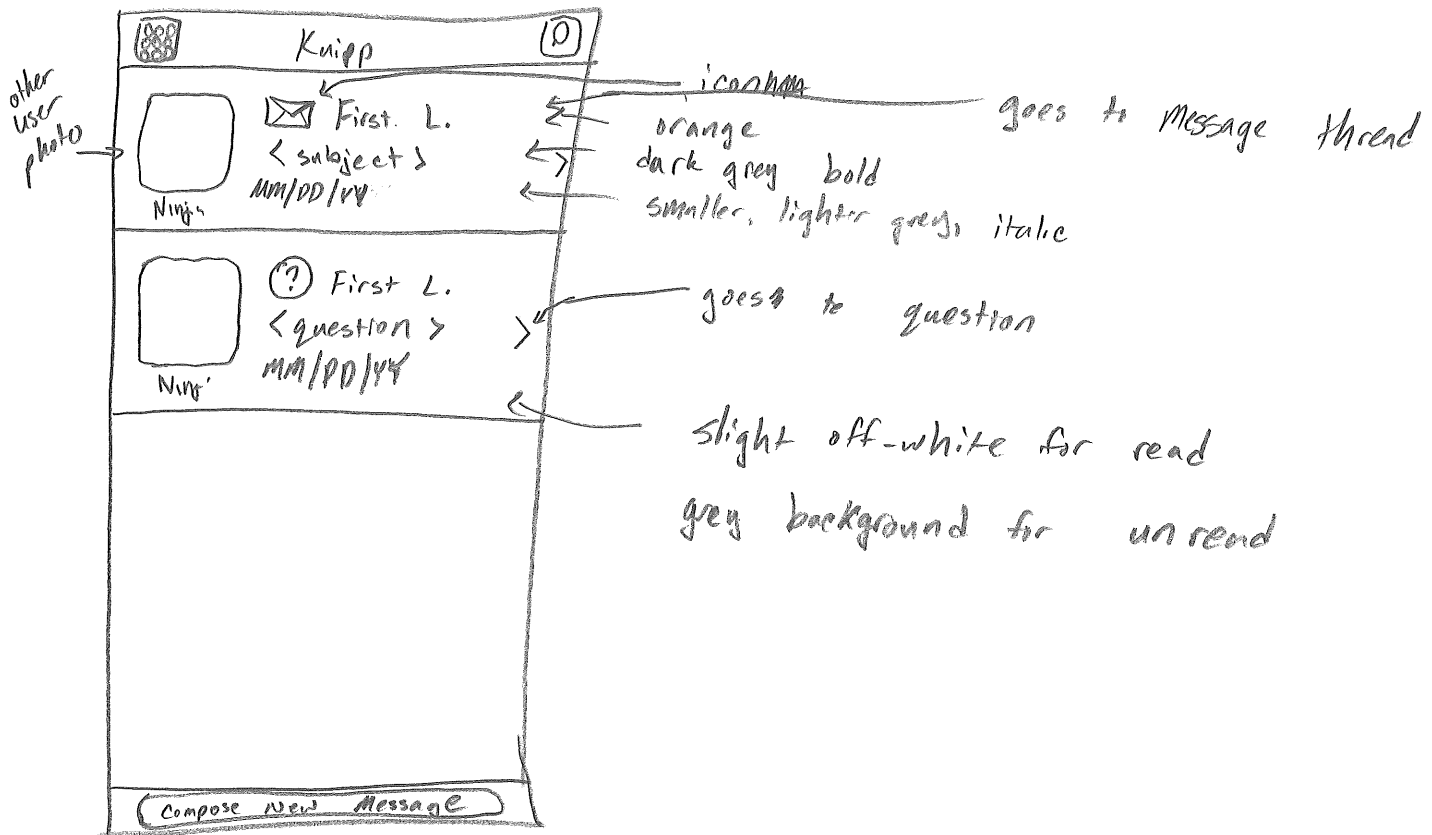

Inbox - Compose

A hand-drawn UI sketch for a mobile application screen titled "Kuipp". At the top left is a back arrow icon. Below the title are two input fields: "To:" and "Subject:". Below these is a large rectangular text input area labeled "Message". At the bottom of the screen are two buttons: "Send" and "Cancel".

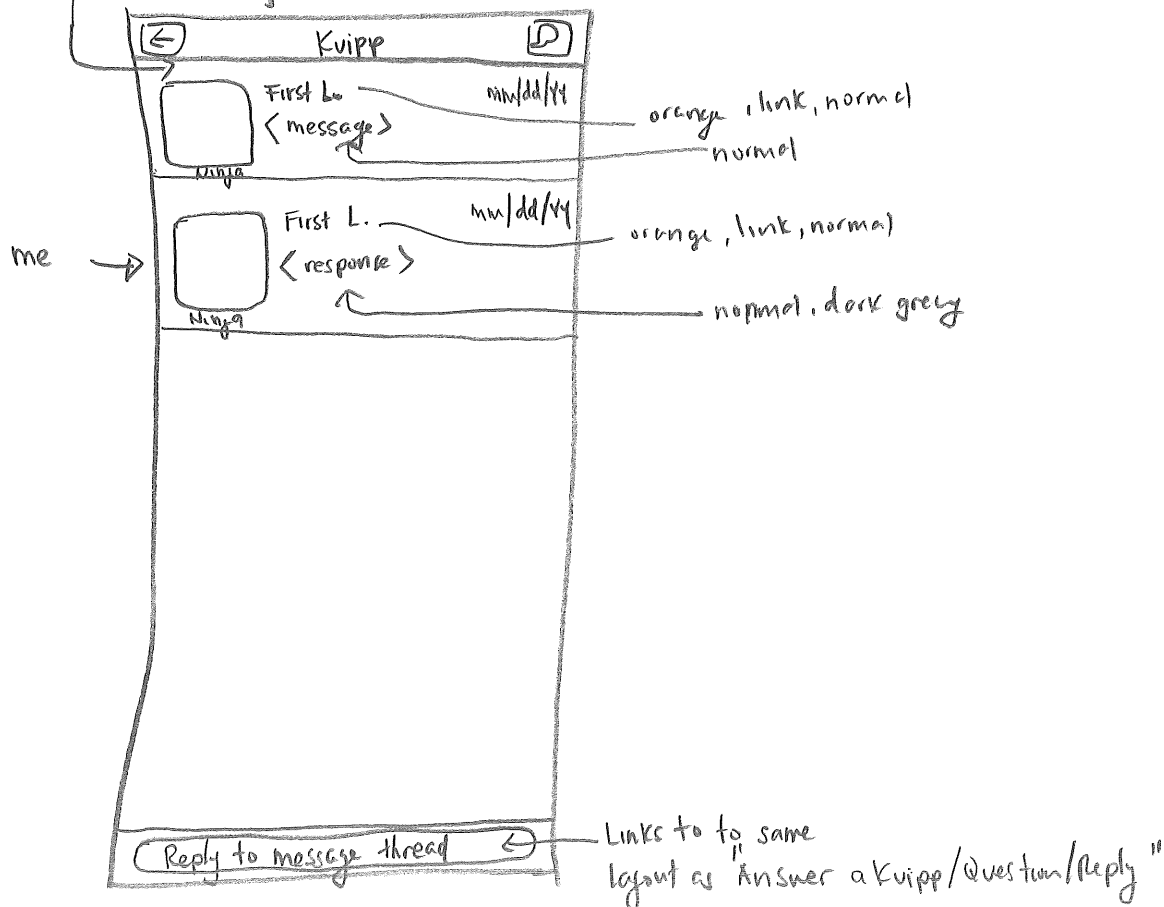

Annotations:

- should bring up pop-up w/ list of all followers for easy selection
- Disappears after select w/ keyboard popup
- Send
- Cancel

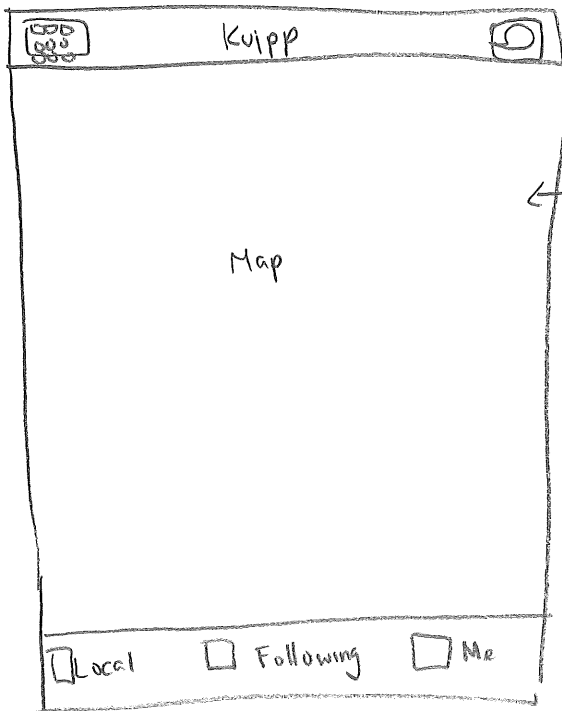

Inbox

grey box w/ subject [dark grey box w/ white text]
Message Thread

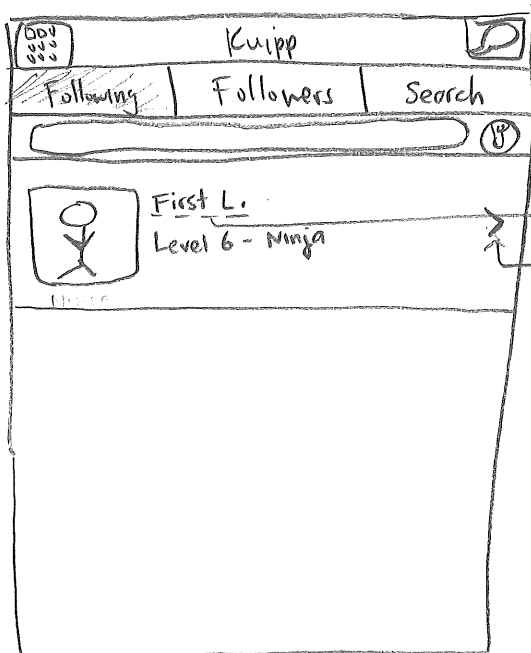

Maps

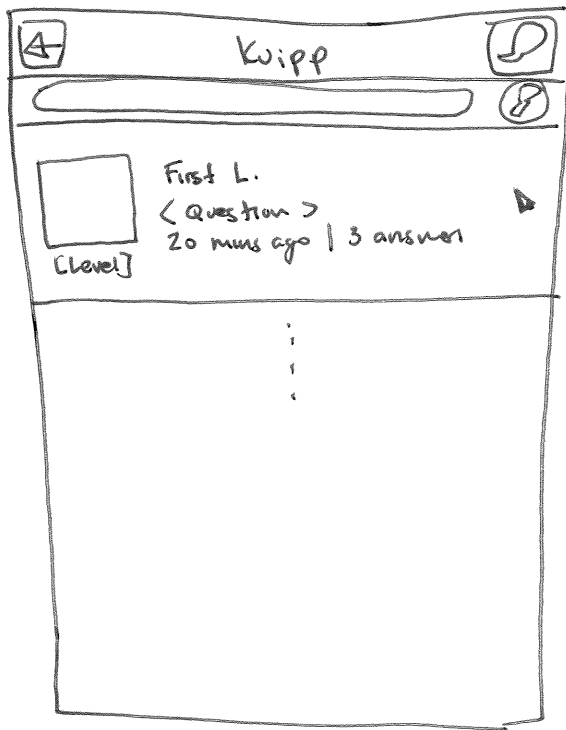

- ← no white space for map
the view should be Map view instead of the current Satellite view
- show only recent questions to not clutter the page (max 20 questions)

Connections

- orange
link to profile
- same for followers
- For "search" tab, it will be showing an empty screen until user types in some one's name
- When you search however, the full name can still be searched for.

Profile = Asked & Answered Kripps (clicking on another users & profile pg.)

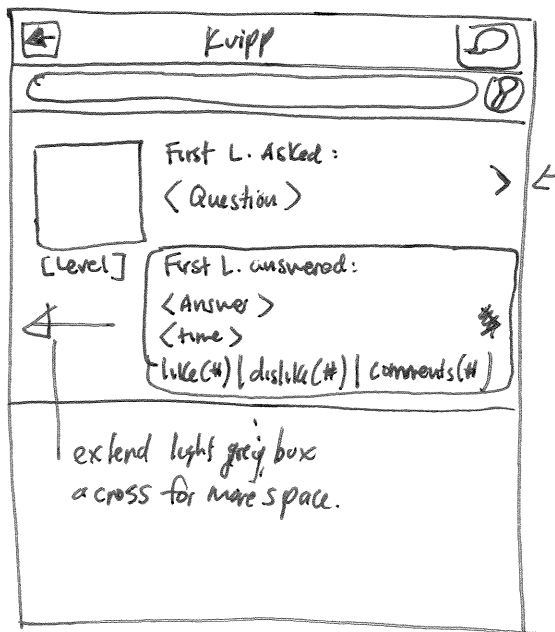

← unlocked search bar

-same format as

My Kripps - Asked / Answered
but w/o the tabs

Profile → Answered Kripps

similar to 'Answered' page, except w/o the tabs

← allows you to click for question
to go to question pg.

extend light grey box
across for more space.
